An **eager-to-learn tester with the experience of 5+ years which includes knowledge of Functional Testing, Automation Testing and API testing.** Along with, being a good team-player and a motivated problem-solver, I also have a determined attitude when it comes to meeting deadlines for testing a product

SKILLS

Typescript Automation Scripting JMeter WebServices Testing API Testing Git Bitbucket Core Java
Selenium Gherkin JavaScript Automated Testing Non-RDMS DB Testing SOLR MongoDB
Functional Testing JIRA SQL LINUX CICD Jenkins GoCD

WORK EXPERIENCE

Associate Tech Lead

Zycus InfoTech

06/2018 - Present

Achievements/Tasks

- **Working on Automation Test Script using CodeceptJS, TypeScript.**
- **Good Hands on experience on Selenium using Java.**
- **Writing and reviewing Gherkin test cases. Suggesting various Innovative and technically adept ideas to resolve the challenges faced within the team/ product.** Handling dynamic element locator using id, class and xpath expression.
- Functional and Automation testing using Typescript Scripts for testing the deliverables. Communicate with development regarding installation issues and software defects. Deliver project and commitment on time in good quality and within budget. Identify, recommend changes to established practices and policies.
- Requirement Gathering and test planning. **Creating Test strategy** for requirements with greater impact on Product.
- Release deployment and management using **CICD with Jenkins and GoCD**.
- Using **Git and Bitbucket** for Version control.
- Using **basic Linux commands** for log analysis.
- Tested the service of Application using **API Testing with Postman**.
- Performed Performance Testing for various Service calls using **JMeter**.

Software Engineer

Capgemini

06/2015 - 05/2018

Achievements/Tasks

- Analyzing requirement by reviewing Functional and Technical specification documents.
- Adhering to various Scrum activities. Learned Agile Process.
- Creation and sharing of monthly status reports with Stakeholders. Reviewing test scenarios and test cases with business and development teams.
- Attending walkthroughs with Business and development team.
- Creating Test scenarios and test cases based on Requirements.

TECHNICAL SKILLS

Selenium

- Learning Selenium using Java with frameworks built using Protractor and TestNG.

Gherkin

Working on Gherkin Cases on a BDD framework.

TECHNICAL SKILLS

API Testing	Tested various Service calls of the current products using Postman and the API Documentation found on Swagger.	Automation Scripting Languages	Using JavaScript and Typescript to perform current Automation Scripting. Developing and executing quality assurance test scripts, tests plans and checklists against Java code.
DB Testing	Have a good knowledge on RDMS DB such as SQL and Non-RDBMS DB such as SOLR and MongoDB. Used the same when it came to test the DB, and plan the strategy to test the migration of same.	Git & BitBucket	Good knowledge on Git and BitBucket, which are being used for Version Control n the current framework.
Linux Commands	Have a decent knowledge on Linux Commands. The same is used when it comes to tracing down issues and sharing logs of Exception.	Jenkins & GoCD	Used various tools for the purpose of CICD. Good understanding of working of Jenkins and GoCD pipelines.

EDUCATION

B.Sc.IT
University of Mumbai
2012 - 2015

H.S.C
Ramnirajan Jhunjhunwala College, Mumbai
2010 - 2012

S.S.C.
R.A.U.B.S High School, Mumbai
2009 - 2010

CONFERENCES & COURSES

Tribal QA Conference (2020)

QA Conference

- The conference which was scheduled in 2020, had a various range of testers using there knowledge to brainstorm ideas and testing strategies.
